

IrriFlex®

Flexible root canal irrigation needle

Join the glide-cleaning revolution

The removal of debris contextual to their production is strategic for any endodontic treatment or retreatment, IrriFlex® should be used since the first stages.

Flexibility

Easily adaptable to even most complex root canal anatomies

Effectiveness

- Back-to-back side vents to allow balanced irrigant expulsion
- Tapered shape to maximize shear stress effect and diffusion of the irrigant

Play with IrriFlex®!

Stay tuned during Dr. Riccardo Tonini's webinar and answer our **Irri-Quiz**

You will get discounts and free samples if you answer correctly
