

Fast, precise and *easy to use*

NeoScan™ 1000

Intelligent Simplicity

Fast scanning for accelerated results

The NeoScan™ 1000 is a fast, precise and easy-to-use intraoral scanner that provides the possibility for a flexible workflow. The simplified USB cable connection gives you the option to share the scanner between dental chairs in your practice. No separate power source is needed.

This easy-to-use scanner is what your practice needs. It supports full-touch screen and there is no need for any powder or pre-heating. The best of all is that the NeoScan 1000 comes at the right price!

- ✓ Easy to use
- ✓ Fast scanning
- ✓ High precision
- ✓ Attractive price

“The NeoScan 1000 is a *superfast, lightweight, and easy-to-use* scanner. I had the pleasure of being part of early testing and have used the scanner for several digital impression indications at my clinic with excellent results. Digital dentistry is in need of more *cost-efficient* solutions so that clinicians can use it to its full potential. The NeoScan 1000 has the potential to do just this.”

– Dr. Marcus Dagnelid
Specialist in prosthodontics | Gothenburg, Sweden

Your solution for *digital impressions*

Compact

The handle is ergonomically designed and is very easy to hold. Even with a compact size it achieves a 16 mm x 14 mm high-definition field of view.

Lightweight

With a handle weight of only 198 grams, like a smart phone, it will not cause discomfort even when held for a long time.

Vivid color

Thanks to high-resolution and true-color images, it allows you to distinguish tooth structure and soft tissues, so that margin lines and undercut areas can be easily identified.

Simplified connection

It is easy to share the scanner between dental chairs. NeoScan 1000 is powered directly by the computer, no need for a separate power supply.

Touch control

With a motion-capture feature and buttons on the handpiece, you can complete the entire process of scanning, optimizing, and exporting without touching the computer.

Attractive price

The best part is that this cutting-edge technology with easy-to-use features comes at a price level that is unbeatable.

Digital dentistry *made easy*

The NeoPro™ software enables you to produce restorations in your own practice or connect to industrial production. It makes your digital impression easy and fast. It's an open system and includes features such as scan history management, smart reminders, margin line tools, inspection and measurement.

Digital impression data sharing and order communication is designed to improve workflow efficiency. With the integrated cloud storage, NeoConnect™ offers a communication tool for data transfer and communication with your laboratory providing a seamless and efficient process.

Hear it from the *experts*

“I had the pleasure of being one of the beta testers for the NeoScan 1000 and I was positively surprised. The scanner is *superfast and lightweight, the data can be processed without any problems* and the first clinical results were convincing.”

– Dr. Fabia Flensburg
Dentist | Essen, Germany

“We have a large experience on intraoral scanners as we have had the opportunity to test the most important brands available on the market. The NeoScan 1000 is an *extremely fast and easy-to-use scanner*. On teeth and on implants it revealed a *great accuracy* in detecting all the details even in difficult clinical conditions.

The generated file is totally open so it is simple to share it with the clinical and technical components of the team. The NeoScan is an *essential device* for a full digital workflow in any modern dental office.”

– Dr. Giuseppe Luongo
Specialist in maxillofacial surgery | Rome, Italy

“As pioneers in the world of digital implantology, we are well-frequented beta testers of new intraoral scanners on the market. The NeoScan 1000 shows *very promising results in terms of resolution, speed, and feasibility*, and already has a permanent place in our digital workflow.”

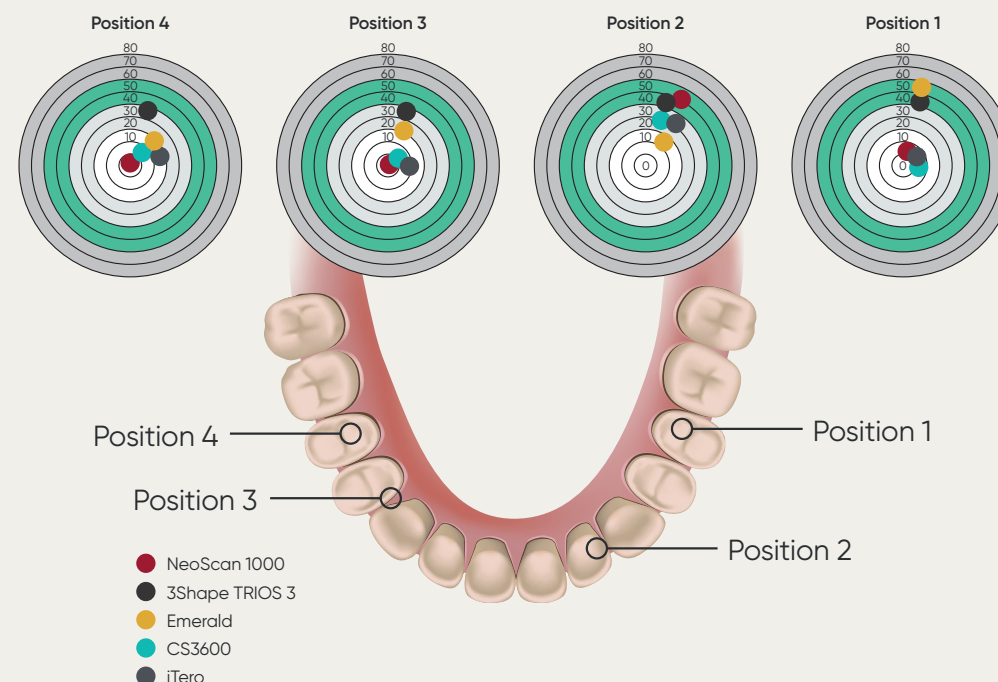

– Dr. Nico Laube
Oral maxillofacial and plastic surgeon | Frankfurt, Germany

“I had the pleasure being part of the feasibility testing* for the NeoScan 1000 intraoral scanner since May 2021, the preliminary test results for *accuracy looks promising*.”

– Dr. Michael Braian
Dentist and dental technician | Malmö, Sweden

*Dr. Michael Braian's bullet chart indicating the comparison of inter cylindrical precision on a dentated model.

“The use of digital technology is an integral part of our clinic workflow. Central to this is the intraoral scanning process for which we require *precision, speed, ease of use and streamlined integration* with our laboratory providers. After extensive testing, I am confident that the NeoScan 1000 fulfills all these requirements and I have no hesitation in incorporating it into our clinic.”

– Dr. Kavith N. Shah
Specialist in prosthodontics | London, United Kingdom

“True to the ethos of Neoss, the NeoScan scanner is an *extremely simple, compact and easy-to-use* piece of kit. It's great for dentists like myself wanting to introduce digital dentistry into their clinics. The set up was very straightforward and *the workflow between the lab and myself has been seamless*. Our patients have been impressed at how quick and efficient the scanner is at recording high-quality information about their mouths. It has improved patient engagement enormously and simplified treatment appointments.”

– Dr. Emilie Abraham
Specialist in prosthodontics | London, United Kingdom
