# A REAL END-TO-END ENDODONTIC SOLUTION COMBINING MAXIMUM VALUE FOR OPTIMUM OUTCOMES

Endodontic procedures have the reputation of being complex and often challenging. At Henry Schein Endo, our mission is to save natural teeth for life, by making endodontics easier, accessible and profitable. Partner with us to achieve optimum clinical outcomes in your practice by connecting with your peers, and staying up to date on the latest technologies. Fulfill and expand your learning while growing the profitability of your dental practice.

We offer an integrated end-to-end solution covering all your Endo needs. Starting from basic research, clinical science and product development, our commitment is to deliver the most meaningful and innovative technologies combining them with workflows that will make your root canals simpler, safer and faster.

Henry Schein, with its portfolio of brands and services is your partner in Endodontics.

Join our movement!

*We offer  
it all.*

# From access to restoration

## Quality

Quality is of utmost importance to us. With our products, you will experience greater performance, predictability and improved patient outcomes.

## Innovation

Our R&D teams in the US, Switzerland and Brazil work with world renowned thought leaders to develop the solutions for tomorrow - always with the patient in mind.

## Product availability

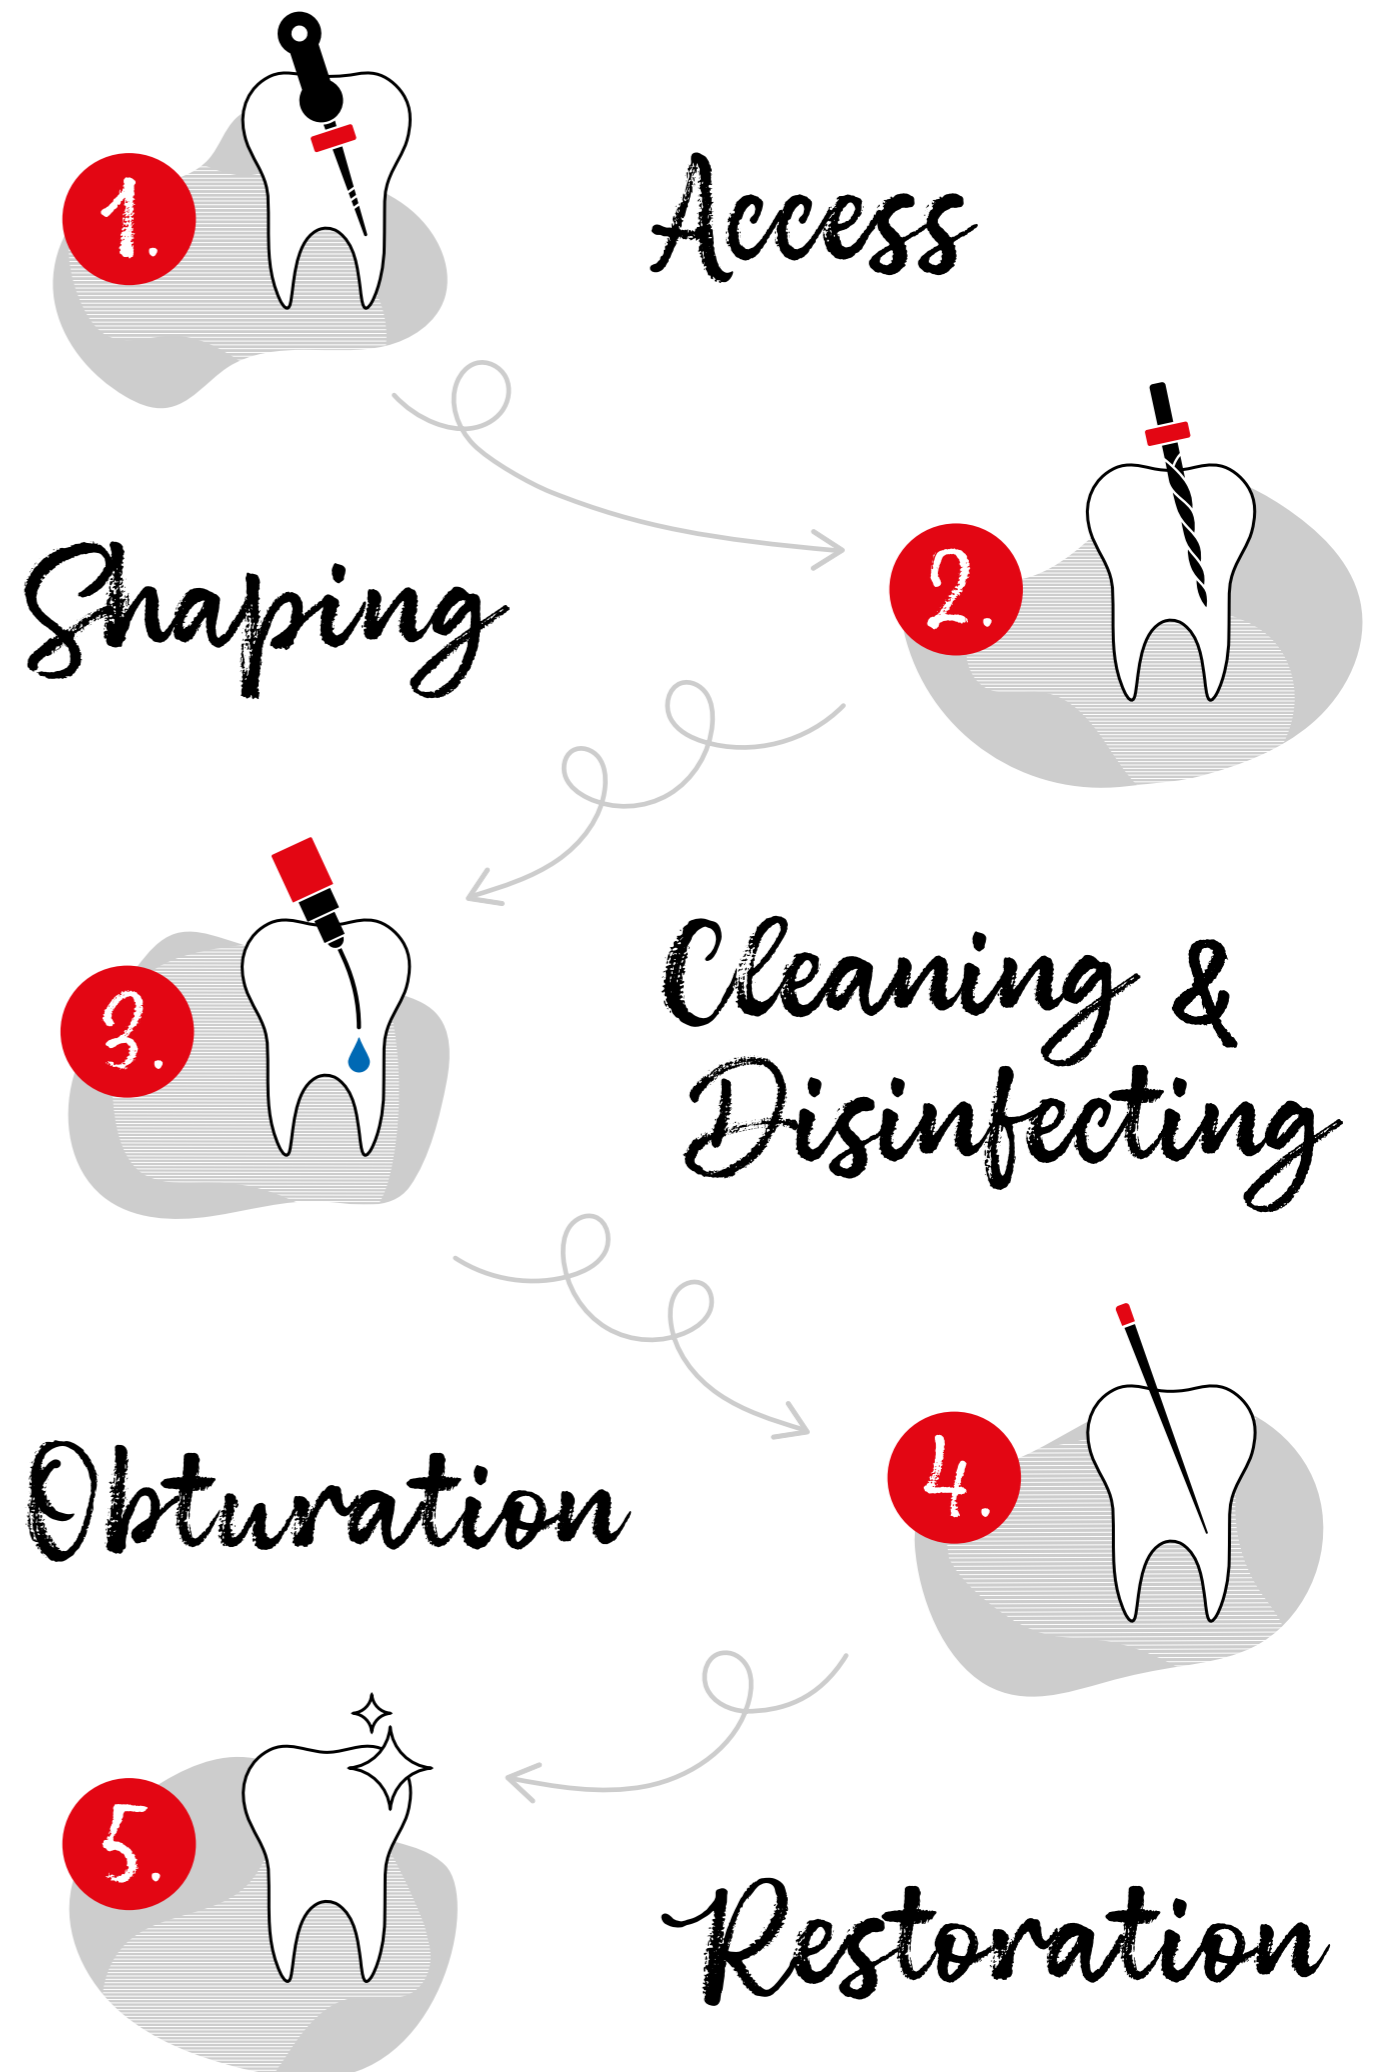

Our products and solutions are readily available through multiple distribution channels including Henry Schein and other dedicated e-commerce platforms.

## Manufacturing capabilities

Our facilities in the US, Switzerland and Brazil produce a diverse range of high quality products from access to restoration.

## People

People make the difference - Always! Our goal is to connect great minds through our endodontic community, our peer-to-peer learning, and our endodontic academy to create more Root Canal Rockstars.

# INT-ENDO connect, share, and learn

We are here to help you deliver better outcomes and achieve your personal and professional goals.

**Made by doctors and dedicated to endodontists, general practitioners, and anybody involved in endodontics.**

## Q INT-ENDO

### **Endodontic community**

By joining INT-ENDO you will join an interactive and international group of peers where you can share your cases, experiences, scientific studies, video and digital content, lectures, and projects. Give and receive feedback and meet more Endo-lovers like you at INT-ENDO.

*Join the community!*

# FKG Dentaire

## Product Portfolio

### From Start to Finish, Complete Root Canal Care

At FKG Dentaire, we are dedicated to continually innovating and enhancing our product portfolio to provide premium solutions to safely address the diverse needs of root canal treatments. Our products are designed to preserve the physiological nature of teeth while effectively addressing endodontists' challenges.

Our range includes a variety of stainless steel and NiTi files, essential for all stages of treatment, from initial opening to final shaping, whether in primary treatment or retreatment. Our flagship mechanized files **RACE® EVO**, **R-Motion®**, and **XP-endo®** are designed to optimize instrumentation duration with high fracture resistance, ensuring safety. For the optimum use of NiTi systems, we launched the **Rooter® X3000**, the fastest cordless endo-motor on the market, with integrated apex locator.

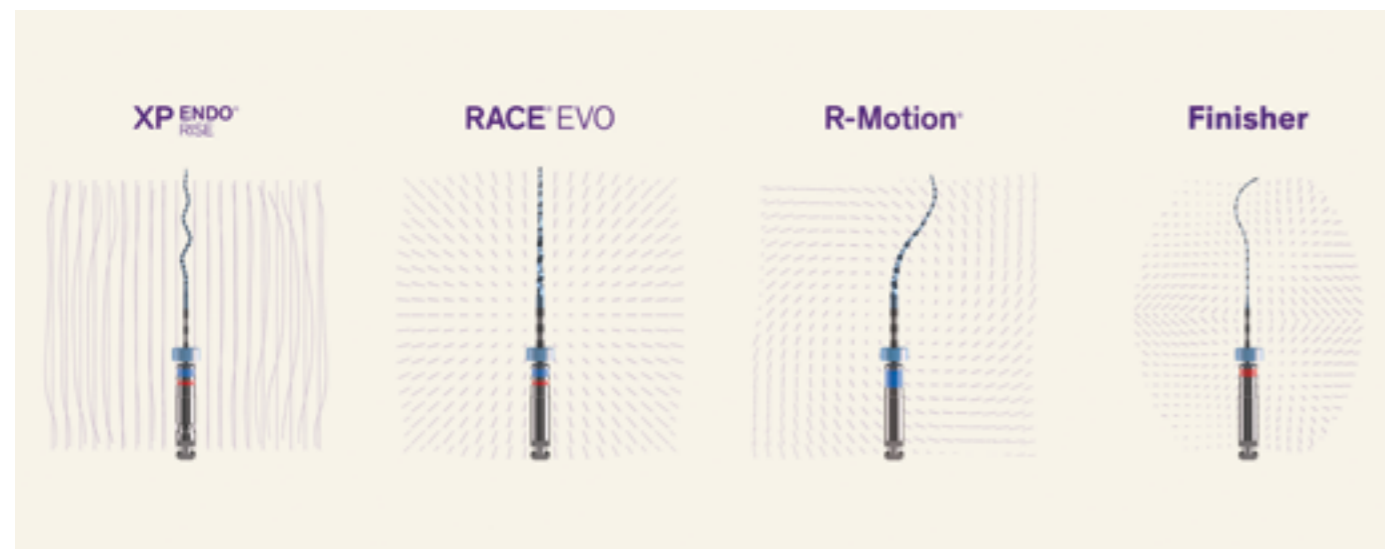

To take canal cleaning to the next level, we have developed a universal

mechanical cleaning solution, the **Finisher**. This device enhances the chemical and physical action of irrigation substances, effectively removing infected material and eradicating bacteria from the root canal system. It also removes debris that could encourage bacterial growth. Sealing is a crucial step on each endodontic treatment.

TotalFill®

At FKG Dentaire we offer the top bioceramic sealer and root repair materials with our proven **TotalFill® range**. This obturation material effectively prevents bacterial leakage from apex to crown, sealing any irritants that may not be fully removed during cleaning and it is highly biocompatible.

High speed  
for maximum  
precision and  
control

By choosing FKG Dentaire, clinicians can rely on a comprehensive suite of solutions that prioritize patient well-being and clinical excellence.

“ I have been working with FKG NiTi files for 25 years and incorporated them both at the university and in my private practice. FKG has proven to be an innovative company developing products to fulfil the biological requirement of the root canal based on scientific evidence. All products aim to reach the root canal anatomy efficiently and safely giving the clinician and patients outstanding experience and predictable results.

In the latest years a new paradigm shift was developed. The XP-endo files are the upmost series of files in the market that seamlessly clean the root canal better than before and showing

by several studies their efficiency to debried pulp tissue, control intra canal infection leading to a predictable outcome, saving more teeth. „

DMD, PhD and specialist in Endodontics,  
Endo Inn AS

# EdgeEndo®

Safe, Easy, Cost-Effective.

Elevate your life and practice with cutting-EDGE affordable technology. EdgeEndo® has proven that quality does not need to come with a premium price. Our solutions are designed for ease of use and are compatible with all endodontic techniques.

Founded in 2012 by American Endodontist Charles J. Goodis, EdgeEndo has rapidly developed into one of the largest players in the global endodontic landscape.

EdgeEndo's success and future are built on our commitment to developing truly innovative products and placing them in the hands of skilled clinicians around the world. Our passion for providing solutions that are safe, easy, and cost-effective has earned us a reputation for maintaining a competitive EDGE.

This is why, about 80% of Endodontists in the USA have partnered with EdgeEndo since 2012.

# EdgeEndo®

## Product Portfolio

**EdgeEndo's product portfolio is developed with your needs in mind. Experience the difference with our cutting-edge systems.**

Here at EdgeEndo we take pride in being recognized as a leading innovator in the field of endodontics, renowned for our disruption in the dental supply industry by offering high-quality products at the lowest costs possible. Established in 2012, our mission was to offer access to premium endodontic solutions at significantly lower prices than traditional companies by sourcing high-quality materials direct. This approach has allowed our rapid expansion from its humble beginnings in Albuquerque New Mexico to serving dental professionals in over 30 countries worldwide.

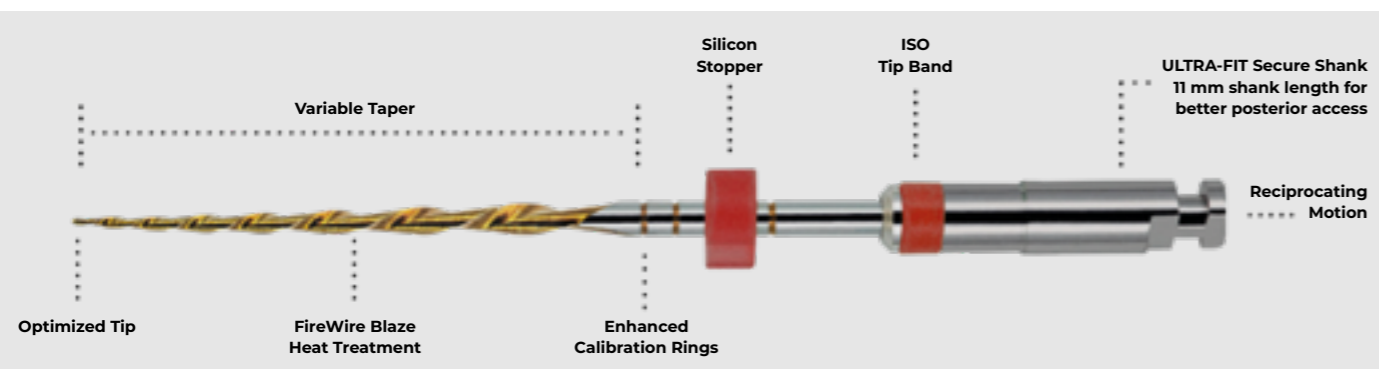

Our success stems from a relentless commitment to the needs of endodontists, delivering products that offer significant savings without compromising quality. We specialize in NiTi files, obturators, gutta-percha points and other essential endodontic tools. From access to obturation we are the preferred choice for dental practices seeking to optimize patient care while managing costs efficiently. Our diverse portfolio of

NiTi files and BioCeramics are proudly manufactured in North America, France and Switzerland ensure the highest standards of precision and performance.

With our NiTi files, you can choose between higher cutting efficiency or flexibility.

Our legacy files include: **EdgeTaper Platinum**, our flexible alternative to the most common rotary files for a crown down technique, our top selling reciprocating file the **EdgeOne Fire**, and the file that started it all, the **X7** our highly resistant and most flexible rotary file. The X7 strength and versatility solidified EdgeEndo's reputation as a brand equipped to empower dental professionals worldwide. The flexibility of our legacy line promises you the ability to safely navigate root canals with extreme curvatures.

Our new Utopia NiTi line features files with very high cutting efficiency so you can reach the apex faster. Our **EdgeTaper Blaze** is used in a crown down technique. The **EdgeOne R** is the reciprocating system most preferred by our customers and the new **X7 Utopia**, presents as our most versatile system yet.

*Created for a better clinical experience*

The EdgeEndo portfolio doesn't end with access and shaping. We're proud to offer a new line of BioCeramic materials to aid in the best obturation outcomes possible.

These BioCeramics feature a patented premixed line of high purity Calcium Silicates and Calcium Phosphates -based BioCeramic sealers, created to regenerate root dentin, reacting to the presence of the moisture naturally present in the dentin.

The new product line includes EdgeBio-Ceramic™ Sealer, EdgeBioCeramic™

ThermalFlow™ Root Canal Sealer, and EdgeBioCeramic RetroFill™ and Perforation Repair, all designed for maximum biocompatibility, healing, and optimal handling.

**“ I recently compared EdgeEndo® NiTi files to my current system. I was pleasantly surprised at their flexibility, durability, and resistance to fracture. The best part there was no change to my technique and I achieved the same result while saving money. EdgeEndo® is now part of my daily clinical practice. „**

**Prof. Gianluca Gambarini, MD, DDS**  
Head of Endodontic and Restorative, La Sapienza University of Rome, Dental School; Director of Master of Endodontics in Sapienza

# DirectEndo®

## Product Portfolio

### Our NiTi Products

At the heart of our offerings are our nickel-titanium (NiTi) instruments. We've developed a unique Gold Heat Treatment process that enhances flexibility, making these instruments ideal for a variety of endodontic procedures.

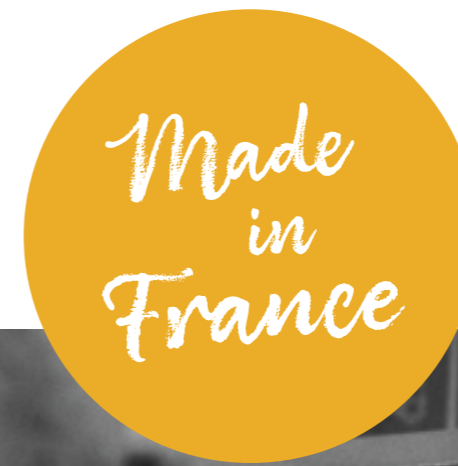

Our range includes both continuous rotation and reciprocation systems to cater to your specific needs.

- **Direct-R Gold** is a reciprocating alternative to traditional blue and reciprocating instruments.
- **Direct-R MI Gold** is a minimally invasive reciprocating option.
- **DirectGold** is a rotary alternative to Gold and tapered instruments.
- **Direct X Gold** is the rotary minimally invasive alternative.

These instruments are designed to be versatile and can be used for a majority of your cases.

For complex or calcified canals, we recommend our Direct-R Glide, a reciprocating glide path instrument.

- **H-Files:** Known for their strong cutting efficiency, H-Files are ideal for enlarging the canal and removing irregularities.
- **K-Files:** The most commonly used handfile, K-Files are essential for various clinical indications, including anatomy, mineralization, curvature, and patency checks.

## Beyond NiTi

At DirectEndodontics we offer a high-quality line of obturation products, including Direct BioCeramic sealer, a calcium silicate Based BioCeramic sealer that has excellent properties and biocompatibility, DirectResin sealer, a resin based sealer and a range of gutta percha and paper points to match our file sizes.

**“ The innovative recently introduced hydraulic sealers, commonly called bioceramics, are probably one of the biggest game changers in endodontics in the last decade. „**

# Angelus®

## Better seal, better heal.

Be safe, be predictable, be the best with the Angelus® endodontic line. One of the most innovative and complete endodontic line. Guarantee of better results and benefits for patients. Bioceramics for dressing, obturation and reparative treatments, and finalizing with one of the widest line of fiber posts for reconstruction of endodontically treated teeth.

Angelus was founded in 1994 by Endodontist Roberto Alcantara with the goal of increasing treatment outcomes through innovative materials.

Made by a dentist for dentists, Angelus solutions combine innovation and total adherence to the real needs of the endodontist, generating comfort for the patient and long-term clinical results.

*Created by  
doctors  
for doctors*

## Worldwide presence

*One of the most complete line of Endodontic Bioceramic and Posts present in all continents!*

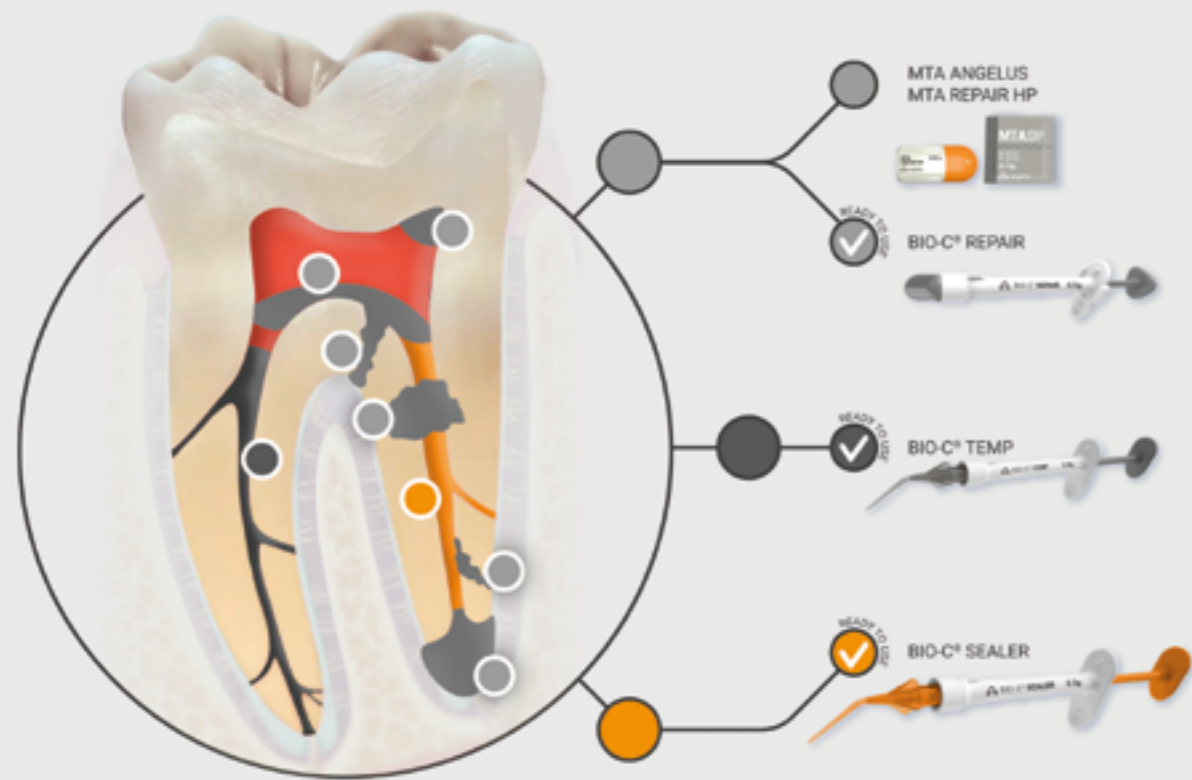

EUROPE | NORTH AMERICA | LATIN AMERICA | EMEA | APAC

# Angelus®

## Product Portfolio

At Angelus®, innovation, technology, and clinical results meet to offer one of the most complete line of Bioceramics and Fiber Posts on the market. Angelus® brings to endodontists best practices for their clinical routine and clinical cases. Developed with state-of-the-art technology, our **Bioceramics line** stands out for its traditional line of reparative cements based on mineral trioxide

aggregate, and its new line of ready-to-use materials, products that have proven biological action and greater predictability of clinical success. The fiber post portfolio stands out for its diversity, with products that meet the needs for minimally invasive Endodontics.

One of the most complete line of Bioceramics in the market

**“ I have used Angelus® Bioceramics for almost 3 decades. It is amazing to see their evolution as a company and the increase of their line up of Bioceramics products. Currently they have the Bio-C Temp intracanal medicament, Bio-C Sealer root canal sealer and Bio-C Repair in a putty consistency and the traditional gray and white MTA with different formulations. I use Angelus® Bioceramics daily on my patients with outstanding clinical results. Angelus® produces great products and it is a fantastic company that cares about people and stands behind their products. „**
