

CLEARFIL™ Universal Bond Quick 2

The Everything Bond

CLEARFIL™ Universal Bond Quick 2 is the latest evolution in dental bonding technology, offering a streamlined, efficient solution for dental practitioners. Designed to enhance your workflow, this adhesive provides robust performance across a variety of clinical situations.

Indications

- ✓ Direct restorations using light-cured composite resin
- ✓ Sealing of a prepared cavity or abutment tooth as a pretreatment for indirect restorations
- ✓ Treatment of exposed root surfaces
- ✓ Treatment of hypersensitive teeth
- ✓ Intraoral repairs of fractured restorations
- ✓ Post cementation and core build-ups
- ✓ Cementation of indirect restorations

Benefits

- ✓ Easy application
- ✓ Quick and straightforward procedure
- ✓ Consistently durable bond
- ✓ High strength bonding layer
- ✓ Versatility for various applications
- ✓ Minimized risk of pooling
- ✓ Ready to use anytime

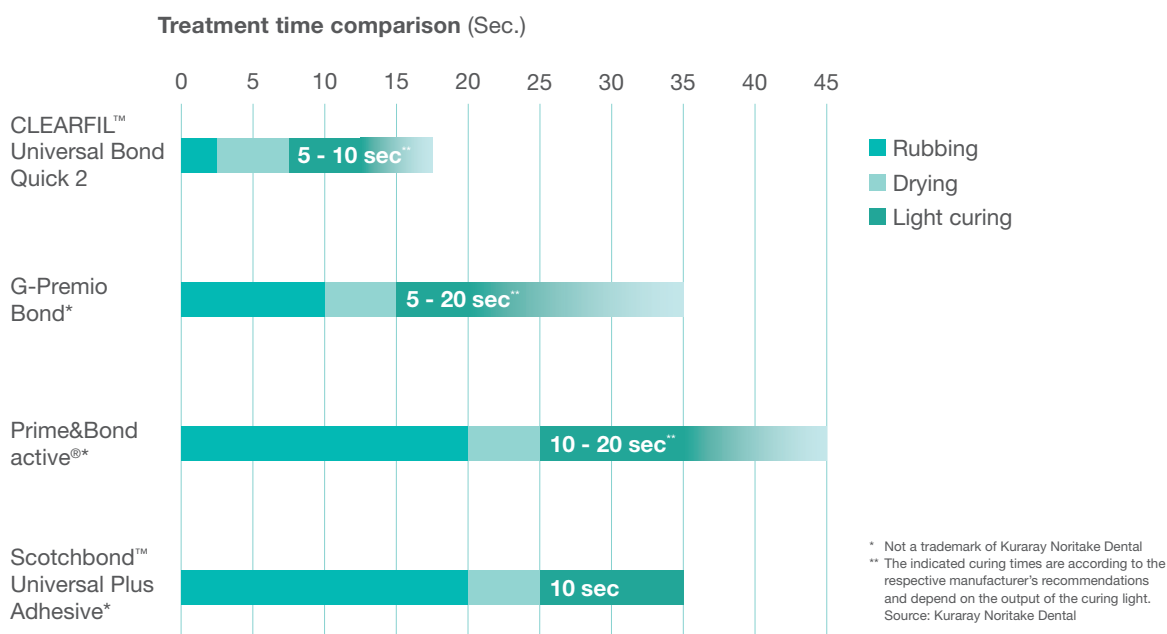

The complex technology behind simplicity

At Kuraray Noritake Dental Inc., we have refined our monomer technology to deliver exceptional bonding performance with minimal effort. Our proprietary Advanced Rapid Bond Technology combines three key monomers – the original MDP, Amide and Urethane Tetra Methacrylate. This creates a powerful adhesive that supports both ease of use and long-lasting results.
